

## MOBILE LOADING BRIDGE RLB-13-HT

### **Built-in hydraulic telescopic lip L530 2000x2250**

Thanks to the telescopic lip – the hanging part of the loading bridge can be regulated easily and very fast to the loading position.

During the loading, the lip is in floating position and follows the height of the trailer's floor, which makes the forklift entering to the trailer and loading very comfortable and smooth.

Length of slope road	9250 mm
Width of slope road	1800 mm
Total length of platform	4000 mm
Width of platform	2440 mm
Height of platform from ground	1000mm-1470mm
Loading capacity	6000 kg
Power supply	400V/50Hz/2,5A

The legs of horizontal platform are separately adjustable  
Loading bridge is easily movable by forklift.
